Four Recalcitrants Refuse to Come

Into the Union.

A Government Printing Office Con-

troversy That Promises to Involve

Certain Representatives in Con-

gress-Contention of Both Sides.

It is reported that the troubles that have beset the Women's Bindery Union for two years, which, it was thought a

short time ago, had been amicably set-tled, have broken out afresh and that they have assumed a character more se-

rious than ever before.

After laboring for two years to bring

into line about 150 women who persistently refused to affiliate themselves with

the union, the leaders of that organiza-

the union, the leaders of that organiza-tion about the 1st of April announced that all but fifteen or twenty of the re-calcitrants had applied for membership cards, and that they were confident the

others would within a few days yield and

The success of the leaders of the union, however, was not accomplished until a walk-out at the Government Printing Of-

they are not in sympathy with labor un ons, and that they have been assured that by holding out against the bindery

that by holding out against the bindery organization they are running no risk of dismissal from their positions: that they, the members of Congress, will stand by them to the end.

This bit of news has, it is said, aroused the leaders of the union to a high pitch of indignation and they are now in for a fight to the finish. The names of the backers of the apparently solid quartette have been obtained and a committee will sound them as to the truth or faisity of the claims of their proteges. The bindery women declare that if it turns out to be a fact that these men are backing the non-unionists in the present struggle, the fight will be carried into their several Congressional districts at the next election, and that nothing will be left undone to defeat them.

The union women aim hold, it is call.

efeat them.

e union women also hold, it is said,
they have borne all that patience
reason can demand in their dealings
i these four women, and that they
now resort to measures that will
er make or break their organization.

y say that it is now a question whethour women, backed by anti-union Repmatives in Congress, shall dictate to resentatives in Congress, 800 women who favor unio: er the 800 shall rule.

LOOKING FOR THE COMET.

Astronomers at the Naval Observa-The astronomers at the Naval Observa ory have not been able to locate the com et recently reported as having been ob fice had been threatened. They declared that unless the non-unionists came into line by Apr'll 1 the union women would served from the Yerkes Observatory, at Williams Bay, Wis. The comet was look-

have gone into the union.

These four women are now the source comet will be continued tonight. scured by clouds. The search for the of considerable solicitude to the union leaders. It was stated today that when Yerkes Observatory early Saturday mornappealed to on several occasions not to ing, and the astronomers there ret stand in the way of a complete organiza-tion, these four women, all of whom are its appearance in the past nineteen years. tion, these four women, all of whom are employed at the Government Printing Office, flatly refused to join, and even went to far as to assert that the union was not big enough to hurt them, as the influences behind them were stronger than the organization, and they had no fear as to their ability to wage a winning fight.

It is also asserted that these women have said that the Representatives in Congress who secured their places for them have given them to understand that

# Poisoned by Absorption

Since that all but four of the outsiders northeastern horizon was partially ob-

POISON OAK, Through the pores of the skin many poisons are absorbed into the blood, deranging the circulation and affecting the constitution as quickly and seriously as those generated within the system. Just under the skin are innumerable hair-like blood vessels, and connecting these with the skin are millions of small tubes or glands, through which the poison is conveyed to the blood system. During the spring and summer, while the skin i: most active and the pores well open, we are much more liable to be affected by Poison Oak and Ivy and other dangerous plants. Workers in brass, copper, lead and zinc have their health impaired and the blood supply poisoned through the absorption of fine particles of these metals and the acids used in polishing and cleaning them. Inhaling the fumes of lead give painters that pallid, waxy appearance of the skin. Barber's Itch is another disease that reaches the blood through the skin, and is a most obstinate one when it becomes firmly fixed in the system. After the poison has reached the blood and been disseminated throughout the system it is too late to resort to local applications. In many cases the blood is affected simultaneously with the appear ance of the rash or cruption on the skin, and all cfiorts should be deceded to the

applications. In many cases the blood is affected simultaneously with the appear ance of the rash or cruption on the skin, and all efforts should be directed to the purification and building up of the blood. Ugly cruptions and sores will cominue to break out in spite of salves, washes, soaps or other external treatment.

S. S. S. is especially recommended for poisons of this character. So completely does it destroy the effects of the Oak and Ivy that there is no possibility of its reappearance, and it is equally as efficacious in brass or lead poisoning or Barber's Itch; building up and purifying the blood and driving out of the circulation impurities of every kind, and removing every blemish, sore or cruption from the skin. There is no substitute for S. S. S.; it is the only purely vegetable blood purifier known, and the safest and best in all constitutional or blood diseases.

Our Medical Consultation Department.—If you design any special information

Our Medical Consultation Department. - If you desire any special information or advice about your case, write our physicians, explaining your condition, and they will carefully consider what you have to say and you will receive a prompt reply. Our physicians have made a study of blood and skin diseases, and you can have the benefit of their experience and skill without any cost to you whatever. Don't hesitate to write fully about yourself, as nothing you say goes beyond our office. We have a very interesting book on Blood and Skin Diseases, which we wanted the same of the same of

### AFFAIRS OF THE DISTRICT

Efforts to Have Municipal Printing Done at Home.

The Resolutions Passed by Columbia Typographical Union Laid Be. fore the Commissioners-A Bottom. less Measure for Local Merchants.

William M. Garrett, Secretary of the Coumbia Typographical Union, has forwarded to the Commissioners a set of resolu tions passed by the union relative to the District Government making contracts for printing outside of the District. The resolutions set forth that such practice tends to take away employment from the District printers, and it is stated that I is better for all concerned that the print also commend the report made upon the subject some time ago to the Commission ers by J. T. Petty, the District Auditor.

W. C. Haskell, Sealer of Weights and eMasures, has addressed the Commission ers relative to certain measures which F. C. Riley wishes to introduce in the District. These measures are described as being bottomless and funnel-shaped, and so made as to be inserted in a paper sack as a convenience and aid in filling such sacks. It is also expected that they will do away with the use of other measures Mr. Haskell, in connection with the mat-ter, calls the attention of the Commis-sioners to the act of May 30, 1896, which defines the standard shape and size of dry measures made of wood to be used in the District of Columbia, but he says nothing is said in the act as to the use of tin or metal measures. Before offering these new measures for sale it is desirable that Round Garters with buckles, 10c kind for the office of the Inspector be informed whether they are lawful measures under the act of Congress, and Mr. Haskell asks that such information be sent to him. The matter has been referred to the Attorney for the District for his opinion.

C. A. Holmes, engineer of the Baltic Building, recently applied to the Com-missioners for permission to leave open the coal chute door in front of the above premises. He stated that in opening the door of the chute the sidewalk space is not lessened to any appreciable degree and that the advantages in the way of ventilation of the basement and boiler-room would outwelfh any consideration as to the occupying of the sidewalk space At the instance of Commissioner Beach, the Board has replied that it is considered inadvisable to grant permits for openings in the public sidewalks to remain open, and that some protection such as a grated door or some other contrivance will be insisted upon in all cases.

The Commissioners have approved the The Commissioners have approved the report of Thomas J. Fisher, the Inspector of Electric Lighting, with reference to the application of J. T. Howard, of Elvin Avenue, Hillsdale, who requested that more lamps be erected in that vicinity. the small balance remaining in the street lighting appropriation, the request be not granted. The application will receive attention under next year's extensions.

Favorable action has been taken by the Commissioners on the application o the Chesapeake and Potomac Telephore Company to erect a line and guy pol on the corner of Mt. Olivet and Bladens burg Roads, also thirteen poles on Mt. Olivet Road, between the Bladensburg Road and Twelfth Street northeast.

Authority has been granted by the Commissioners to the Chesapeake and Potomac Telephone Company to string wires from their cable pole, at the corner of Nineteenth Street and Florida Avenue, along Nineteenth Street, Woodley Lane and Tenleytown Roads to the District line for the purpose of connecting prem

The Commissioners have named a com Superintendent of the Water Department;
D. E. McComb, Superintendent of Sewers; Charles B. Ball, Inspector of Plumb-ing, and C. F. Eckloff, Chief Inspector, Water Department, to examine the vari-

line by Apr'll 1 the union women would refuse to work with them and a strike ed for last night, but was not to be seen. This was in part due to the fact that the laid on the east side of New Jersey Ave-Orders were issued today by the Comnue between E and Ivy Streets south-east, at an estimated cost of \$355, charge-able to the current appropriation for re-placing obstructed sewers.

That the work of rolling and spreading macadam stone on the Benning and Ana-costia Roads be done by day labor at an estimated cost of \$600, chargeable to the special appropriations for said roads.

By order of the Commissioners the liense of Elliot F. Barr as meter plumber was extended for a period of five years

from May 1, 1961, upon the filing of proper
